

Concept 2

The Round

The "Round" concept creates a larger space at the central green and a perched sandy area at the waterfront, using soft curving lines and evoking a relaxed natural beach atmosphere. Energy is focused inward to the park, where people can gather around a number of integrated uses - events, dining, water play, playground, gardens, and picnics. The waterfront conversely offers a more intimate relationship with nature - with pathways hovering over the water amidst an ecologically rich shoreline.

The unique features of this concept include:

- A more conservative approach to food and dining at the entrance to the park, with the ice cream parlour and additional food building. Integrated in the area is a small dining deck and moveable tables and chairs.
- A new water play experience with wading pool and spray plaza integrated with the open lawn and garden plaza. The new experience would be in place of the existing pool.
- An enlarged open green space to better accommodate events and circulation. Requires removal of a few parking spaces on the south end and a shift in picnic shelter location.
- An enhanced performance/events experience with the creation of a new stage with a backdrop of the inlet.
- The playground remains of similar size, with some improvements for accessibility and age gaps.
- An expanded youth zone, with an improved relationship to the playground area.
- A new open plaza space at the water's edge, with unimpeded views and feature seating.
- An integrate perched beach experience nestled among pollinator gardens.

- 1 Inlet Plaza
 - 2 Perched "Beach"
 - 3 Great Lawn
 - 4 Shoreline Walk
 - 5 New Inlet View Stage
 - 6 Wading Cove
 - 7 Playground
 - 8 Spray Plaza
 - 9 Dining "Village"
 - 10 Youth Zone/Forest
 - 11 Dog Park
 - 12 Food Truck Parking
 - 13 Boat Ramp Parking
 - 14 Quiet Picnic Lawn
 - 15 Shoreline Restoration
 - 16 Service Area (Removal of Shop Building)
 - 17 Picnic Shelter
 - 18 Kayak Storage
