Concept 3 The Walk

The "Walk" concept dedicates a generous area for activity at the water's edge, while retaining the pool use in the park with an upgraded facility. A large boardwalk and picnic grove offer dining, lounging and gathering alongside water play, extending east from the pier. The concept has long straight pathways parallel to the water, which emphasize views and define a series of open spaces versus a single larger green.

The unique features of this concept include:

- A new feature outdoor pool and integrated community building at the entrance of the park, alongside the existing ice cream shop. Pajos also remains in its current location.
- Smaller defined green lawn areas to accommodate various event sizes
- A new water play experience in the same location as the existing spray park.
- An enhanced performance/events experience with the creation of a new stage with a backdrop of the inlet.
- An expanded and integrated kids play and youth zone in one.
- A new lively waterfront experience, with a large open deck for lounging and enjoying views out to the water, and transitioning to a shaded picnic area and integrated water play feature.
- Additional picnic shelters further east in the park. The existing shelter on the west remains in place.

Former Mill Site
Future Development

Connection to future development subject to further discussions

Remove cars from slip lane for improved pedestrian arrival

Improve pedestrian experience on overpass

Old Mill Boathouse

Pajos

RP Ice Cream

Existing pool outline

Washrooms

Shoreline restoration methods to align with the City's climate action and flood strategy studies.

*The concept plans illustrate different park elements that are not exclusive to any one concept and may be combined for a final preferred concept.
